Introduction
DEAR COLLEAGUE

Thank you for making the 2019 MWC Los Angeles, in Partnership with CTIA, a resounding success.

Held for the second time at the Los Angeles Convention Center (LACC) and for only the third time overall, we’re very pleased with MWC Los Angeles and are confident it is one of the most successful new events in the industry. Our focus is on quality in content, sectors and attendees. It is important that we convene the right people so participants can conduct the right business. A total 68 percent of this year’s attendees held senior-level positions, including more than 2,000 CEOs, and women comprised 22% of delegates and 32% of keynote speakers. In addition, more than 225 international print, broadcast and online media and industry analysts attended the event to report on announcements and activities taking place at MWC Los Angeles.

Under the theme of Intelligent Connectivity, MWC Los Angeles showcased how the combination of 5G, AI, Big Data and IoT will positively impact multiple industries and improve the way we live. The conference program looked at four major themes: 5G, IoT, Disruptive Innovation and Immersive Content. CEOs, senior executives and thought leaders gathered to explore these themes while discussing key developments in the broad mobile ecosystem.

Throughout the LACC halls, leading companies displayed the latest disruptive products, technologies and services in exhibition stands and hospitality spaces. Spanning 68 hours and featuring 300 speakers, the conference program illustrated the many sectors benefiting from 5G including automotive, media and entertainment, finance and security, to name a few. At the same time, attendees leveraged the event to advance business opportunities.

Once again, MWC Los Angeles hosted the 4YFN Startup Event, which brought together more than 300 startups, investors, corporations and public institutions to connect and launch new ventures together. The Women4Tech program also returned to Los Angeles to champion diversity in the mobile industry. In addition, the Youth Mobile Festival (YoMo) returned for second year, bringing together science and technology education with mobile to provide hands-on learning experiences to over 14,000 participating area students.

We thank all of our attendees, exhibitors, sponsors and partners for helping us make MWC Los Angeles a must-attend event. We also extend a warm gratitude to our partner, CTIA, for their ongoing support in delivering a world-class event.

We look forward to welcoming you back next year; MWC Los Angeles will be held October 28-30, 2020 at the LACC.

Warm regards,

John Hoffman
CEO
GSMA Limited

A Diverse Event Audience

In 2019, MWC Los Angeles attracted attendees from the telecommunications and mobile network operator community, as well as adjacent vertical industries, and developers. Among the industries represented, Telco, Operator and Network Infrastructure represented 27% of attendees. Included in “Other” industries are Finance/Banking, Cybersecurity, Automotive, and Association/Not-For-Profit.

Attendees by Company Type

- Telco, Operator & Network Infrastructure - 27%
- App/Software Development - 12%
- IOT/M2M - 9%
- Retail/E-Commerce - 6%
- Manufacturing - 6%
- Cloud Services - 5%
- Media/Entertainment - 5%
- Information / Analytics/ Business - 4%
- Systems Integrator - 4%
- Government / Regulatory Bodies - 3%
- Other - 19%
MWC Los Angeles attendees indicated interest in a variety of topics, most looking at the future of the mobile industry. Attendees were asked to select their top three areas of interest. Leading topics of interest included 5G/IoT, Artificial Intelligence (AI), App/Mobile Services, Network Technology, Media and Entertainment, and Innovation.

Exhibition Highlights

Innovation City
The GSMA’s Innovation City presented an immersive showcase of the latest innovations in mobile with a particular focus on Intelligent Connectivity. Alongside leading brands including LivePerson and MasterCard, the GSMA highlighted its key programs featuring Internet of Things, Mobile Connect, Future Networks, GSMA Intelligence, Device Services and #BetterFuture. Attendees visiting Innovation City experienced first-hand how mobile-connected products and services are improving the lives of citizens, enterprises and governments around the globe.

Country Pavilions
Services and solutions from around the world were featured in the Country Pavilions. With almost 43% of exhibitors coming from outside of North America, these Pavilions provided attendees the opportunity to explore and experience the latest cutting-edge technologies from countries and regions around the world.

Showfloor Talks (5G Talks & IoT Talks)
With stages in the IoT Zone and South Hall Open Theatre, attendees gathered to hear thought leaders, industry experts, and organizations share the endless possibilities of 5G and IoT services and applications and their global transformative impact in the era of Intelligent Connectivity.

YoMo
In its second edition at MWC Los Angeles, YoMo welcomed over 14,000 students and over 1,000 educators for an interactive showcase of science and technology. Over the course of three days, YoMo brought classroom learning to life by delivering a wide range of educational STEAM content in a fun and engaging atmosphere: from deep-dive workshops, to dozens of hands-on activities and inspiring presentations.
Representing the Entire Mobile Ecosystem

Companies and organizations exhibiting at MWC Los Angeles 2019 represented all facets of the industry.

Thought Leadership Focused On Intelligent Connectivity

The mobile industry, led by the operator community (12%) gathered as the best and brightest individuals provided insights on current and future trends. The MWC Los Angeles conference program attracted attendees from adjacent industries across the ecosystem app/software development, network infrastructure, IoT/M2M, retail/e-commerce, manufacturing, and media and entertainment.

Top 10 Industries

- **Telco, Operator & Network Infrastructure** - 28%
- **App/Software Development** - 10%
- **Consultancy** - 8%
- **IOT/M2M** - 7%
- **Manufacturing** - 6%
- **Retail/E-Commerce** - 6%
- **Cloud Services** - 4%
- **Government/Regulatory Bodies** - 5%
- **Finance/Banking** - 4%
- **Media & Entertainment** - 4%

GSMA Intelligence

GSMA Intelligence, the definitive source of mobile operator data, analysis and forecasts, released three research reports during MWC Los Angeles including Financing the 5G Era in the US, Understanding Enterprise IoT Adoptions in the US, and Are US Consumers 5G Ready?
4YFN Looks to the Future

A highlight of MWC Los Angeles, the 4YFN Startup Event was a sold out success, bringing together more than 130 startups and exhibitors, 200 investors representing almost $2.5 billions of funds available for startup investments, and leaders from the tech industry to connect, grow and launch new ventures together.

4YFN Investors Club Partner, Expert Dojo, organized more than 500 meetings between startups and investors as part of its Investors Festival. In addition, the 4YFN Community Club Partner Sprockit brought a full program of media and entertainment leadership to the 4YFN Stage.

The 4YFN Stage, powered by Karix, welcomed Indiegogo’s CEO Andy Yang for the first time and hosted speakers from across the tech spectrum. Topping the bill for the event was 4YFN Startup Awards, Dashmote, who took the title of best start-up at MWC Los Angeles with its AI-driven platform to turn images into powerful insights.
MWC Los Angeles featured one-of-a-kind events, seminars, and experiences designed to help educate and excite attendees. These programs were developed and presented by some of the top organizations in the mobile ecosystem.

**Women4Tech**
The Women4Tech program provided a global platform addressing the gender gap and championing inclusion within the mobile industry. Women4Tech included the Women4Tech Summit, Networking Reception, Speed Coaching & Networking, as well as networking events and initiatives at 4YFN that offered three days of in-depth analysis of the topics shaping diversity in the mobile industry.

**Partner Programs**
Partner Programs allowed attendees the opportunity to engage and learn from some of the top organisations in the industry. Event partners developed agenda content to reflect their vision on a variety of complex and diverse ecosystem challenges they currently face. Presenters engaged with attendees on a variety of topics including industry insights, company solutions, product launches, demonstrations, case studies, panel discussions and workshops which provided valuable knowledge concerning the rapidly growing mobile ecosystem.

**Topic Tours**
MWC Los Angeles Topic Tours provided attendees the opportunity to focus their time on topics of interest while gaining new insights and connections. Guided by industry experts, attendees were led through the mobile ecosystem while being introduced to exhibitors and networking with fellow attendees. Four Topic Tours took place in LA, including: 5G & NFV, IoT, Transformative AI, and What’s Hot at MWC Tour.

**DARPA Spectrum Collaboration Challenge**
The Defense Advanced Research Projects Agency (DARPA) Spectrum Collaboration Challenge took place on Day 2 in front of 600+ attendees. 10 teams competed over 6 rounds of competitive matches where they reimagined spectrum access strategies by developing and employing new wireless paradigms to optimize spectrum usage using Artificial Intelligence. With $4M in cash prizes up-for-grabs, ultimately it was GatorWings - the team of undergraduate students, Ph.D. candidates, and professors from the University of Florida - who emerged victorious, winning the $2M top prize.

**NVIDIA/Deep Learning Institute**
At the NVIDIA Keynote, attendees were the first to hear about ground-breaking innovations that will advance Intelligent Connectivity. Throughout the event, NVIDIA Deep Learning Institute offered hands-on training on intelligent video analytics, signal processing, data science, and more, powered by GPUs in the cloud.
Global Media Reach

A total of 260 media and industry analysts attended MWC Los Angeles 2019 to report on the many breaking news taking place at the show.

Media and analyst representation spanned a variety of international broadcast, print, online, business, IT, telecom, consumer electronics, lifestyle, daily and vertical industry media outlets as well as mobile and telecommunications industry analyst houses.

Media coverage highlighted the show’s key themes across top tier media outlets including ABC, Bloomberg, Cheddar, CNBC, FierceWireless, Forbes, Mashable, Nikkei, El Universal, Wall Street Journal.

Throughout the 3-day event, attendees were able to engage with exhibitors while immersing themselves in content related to their areas of interest, including industry related articles, videos and event highlights via Mobile World Daily, the Official Newspaper of MWC19 Los Angeles.
In the News: 2019 MWC Los Angeles is the Leading Industry Destination

“The mobile technology industry opened the doors of its convention in California (USA), a version of the MWC of Barcelona centered on the American continent and in which the latest developments of 5G will converge with the entertainment industry, increasingly linked to connectivity”
EFE

“If you’ve been following the last year of developments in the mobile world, you already know that 5G and mixed reality (XR) are two of the industry’s biggest topics right now, so it’s no surprise that they stood out at this week’s Mobile World Congress (MWC) Los Angeles”
VentureBeat

“The talks that opened the Mobile World Congress trade show in Los Angeles were Southern-California sunny about 5G wireless.”
Fast Company

“With over 20,000 attendees this year, [MWC Los Angeles] is buzzing. Everybody is really excited, especially here on the expo floor.”
TechRepublic

NVIDIA Deepens Its AI Edge Opportunity With 5G, Software And Industry Support

I help firms understand AI, and how to position to optimize their business

Edge computing is hot. In fact, there isn’t one edge but several. There’s the connected device edge (mobile, PCs, and IoT). The trend in edge computing is to analyze and act on data closer to the source where it was created. The edge computing concept expanded as more devices were connected, 5G network deployments started to roll out and companies wanted faster access to insights.
